

C(D)G5-S, Stainless Steel Cylinder, Double Acting, Single Rod CDG5BA32TFSV-50

Datasheet

SMC's CG5-S series is a stainless steel cylinder, perfect for use in wash down applications such as food processing machinery requiring intense cleaning. The use of non-toxic additives allows confident use in equipment for foods, beverages and medical products, etc. The CG5-S can be disassembled, allowing replacement of seals, which promotes an extended service life. SMC provides plugs for unused mounting threads to prevent residue build-up in the threads. The use of stainless steel (SUS304) on external metal parts provides improved corrosion resistance in environments with exposure to water.

Double-acting cylinder with cushioning adjustable at both ends, single piston rod
